

Relational Algebra

branch (branch_name, branch_city, assets)

customer (customer_name, customer_street, customer_city)

account (account_number, branch_name, balance)

loan (loan_number, branch_name, amount)

depositor (customer_name, account_number)

borrower (customer_name, loan_number)

1. Find all loans of amount over \$1200
2. Find the loan number for each loan amount greater than \$1200.
3. Find the name, loan no and loan amount of all customers who have a loan at the bank.
4. Find names of all customers who have either a loan and deposit account at the bank.
5. Find names of all customers who have a loan at 'DUMDUM' branch.
6. Find names of all customers who have an account at 'Redwood' branch.
7. Find names of all customers who have a loan at 'DUMDUM' branch but don't have any account at any branch.
